

# Aluminium Angle

The purpose of Aluminium Angle is to provide protection of a tiled surface against chipping and wear.

As a more economical alternative to Brass or Stainless Steel, Aluminium is widely used, and has the flexibility of being able to be produced in a wide range of finishes / colours that can be utilised with various ceramic tiles and natural stones.

The Aluminium Angle can also be installed between two alternative types of flooring to create a border or decorative "strip."

More recently, Aluminium Angle has been installed vertically to finish off tiling around doors, windows, and walls where an adjoining wall is not being tiled.

The Aluminium Angle is available in the following sizes and finishes as listed:

<b>Aluminium Angle - Available in 1m or 3m lengths</b>						
<b>B.A.T. Code:</b>	<b>A (mm)</b>	<b>B (mm)</b>	<b>C (mm)</b>	<b>D (mm)</b>	<b>E (mm)</b>	<b>F (mm)</b>
