

Cove Trim

The B.A.T. Cove Trims' core purpose is to create a radius between wall and floor tiles that is easy to clean.

Designed in close consultation with Health Departments and Architects, the Cove Trim - when correctly installed, provides a sealed surface between wall and floors that is easily cleaned, thus eliminating dirt and dust build up and potential bacterial growth.

Available in six different size combinations, the Cove Trim will suit virtually any popular wall and floor tile thickness. Pre-fabricated corners, joining pieces, and end caps are also readily available to compliment the Cove Trim, allowing for a trouble free and time efficient installation, that will provide an aesthetically appealing and hygienic coving system.

The Cove is highly recommended for use in commercial kitchens, food preparation areas, and any installation where a hygienic finish between wall and floor is required.

Cove Trim - Available in 3m lengths
